

# AMCO BAAP In OneStream

## A starter kit for OneStream implementations

AMCO BAAP (Basic Application Accelerator Platform) is a pre-configured, best-practice starter kit for OneStream implementations. Designed by AMCO Solutions, it enables organizations to launch their financial consolidation, planning, and reporting projects faster, with lower risk and greater confidence.

### Solution Highlights

Features	Description
Dimensions	Pre-built Entity, Account, Scenario, Flow and Reporting dimension
Business Rules	Centralized, modular rules for calculations
Security	Role-based access and audit trails
Workflows	Standardized import, forms, journals, review
Dashboards	Review & admin dashboards
Templates	Cube views, forms, transformation rules

### Key Benefits

- ✓ **Rapid Deployment:** Start with a proven, ready-to-use application structure—reduce implementation time and cost.
- ✓ **Best-Practice Design:** Built on AMCO's deep OneStream expertise, incorporating robust naming conventions, security, and workflow standards.
- ✓ **Scalable & Flexible:** Easily extend and customize to meet unique business requirements.
- ✓ **Audit-Ready:** Comprehensive security, workflow, and data management controls ensure compliance and transparency.
- ✓ **Future-Proof:** Regularly updated to align with the latest OneStream releases and industry standards.
