

# AMCO Bookmarks

**AMCO Bookmarks** is a productivity-focused dashboard designed to help users organize their day-to-day navigation inside OneStream. It converts frequently used **dashboards**, **cube views**, and **reports** into **visual, personalized bookmarks** that users can structure however they like.

With AMCO Bookmarks, users can create folders, group views by topic, and build a clean, intuitive workspace that supports faster access, reduced searching, and smoother workflows.

The result is a streamlined experience that helps end users stay organized and productive across complex planning and reporting environments.

## Key Outcomes

### 1. Increased Productivity & Faster Navigation

Users dramatically reduce time spent searching for dashboards and cube views. Frequently accessed content is always one click away.

### 2. Better Workflow Structure & User Experience

Personalized folders and visual bookmarks give users clarity and structure. Navigation becomes intuitive and organized, even in large applications.

### 3. Improved Adoption & User Satisfaction

New and existing users find it easier to work in OneStream. Organized access paths reduce frustration and increase overall system usage.

### 4. More Consistent Access to Critical Content

Users no longer lose time navigating complex folder paths. Key dashboards and cube views become centrally visible and accessible.
