

ESG REPORTING & PLANNING In OneStream

Comprehensive Solution That Ensures Compliance With Global Standards

With our expertise as a OneStream implementation partner, we deliver a comprehensive ESG Reporting & Planning solution designed to help organizations comply with leading global standards, including Corporate Sustainability Reporting Directive (CSRD), European Sustainability Reporting Standards (ESRS), Global Reporting Initiative (GRI), Sustainability Accounting Standards Board (SASB), Carbon Disclosure Project (CDP), and others.

The solution focuses on collecting, organising, and processing accurate data. This structured approach is subject to external audits, ensuring the data is complete and verifiable by a third party. By utilising OneStream's unified platform, ESG reporting is integrated with financial processes, providing consistency, reliability, and comprehensive auditability throughout the sustainability reporting lifecycle. We leverage the following capabilities of OneStream to deliver the ideal ESG reporting solution (see diagram).

Key Benefits

Advanced data quality capabilities, to analyse on the lowest level of details required

Logging activities for a full audit trail

Streamlined workflow to guide the end user through the whole process

Team of flexible consultants for end-to-end support, tailored to the customer's needs

Certification of data fosters ownership and accountability

Covers all aspects of ESG and specifically carbon reporting, including Scope 1, 2, and 3 emissions

How Can ESG Be Delivered Using OneStream

- Evaluate and record current ESG processes and systems
- Understand who owns each section of data
- Phase 1 - Create one version of the truth
- Ready for international regulation
- Phase 2 - Plan for the future
