

# AMCO Keyword Search

This dashboard provides an easy-to-use, comprehensive search tool that allows users to **enter a search pattern** (e.g., a text string, UD reference, account code, formula keyword, object name) and instantly return all matches across key OneStream components.

The module will scan and return results from:

- **Dimension Members & Business Rules**  
Includes member formulas, dynamic calculations, consolidation operators, UD fields, and BR logic.
- **Cube Views**  
Searches rows, columns, expansions, member filters, and embedded calculations.
- **Dashboards & Workspaces**  
Searches within dashboard scripts, XFBR calls, parameters, data adapters, and display logic.
- **Metadata**  
Any relevant metadata components.
- **Data Management**  
Finds references within DM sequences, profiles, load rules, and event handlers.
- **Task Scheduler**  
Identifies scheduled jobs that use the searched object or string.

## Preview

The screenshot displays the AMCO Keyword Search interface. The search term 'equity' is entered in the search bar. The results are organized into two main sections: 'Cubeviews that contain equity' and 'Details for TR02\_From IFRS to Social'.

**Cubeviews that contain equity**

GroupName	CubeViewName
1300_FORMS_TAX	1301_DE_IFRS_To_Local
1300_FORMS_TAX	1302_DE_Local_To_Fiscal
1300_REPORTS_TAX	TR02_From IFRS to Social
1300_REPORTS_TAX	TR03_From Local to Fiscal
1800_Reports_LocalEntities	1812_rp_Equity
1900_ConfirmationRules	1903_ConfirmationRules_L01_EQU
9500_Templates_Rows	9510_BS_Summary_Rows
9500_Templates_Rows	9511_BS_Detailed_Rows

**Details for TR02\_From IFRS to Social**

Where used	Property	Value	Path

## Common Use Cases

- **When updating or deleting a member:** confirm where it is referenced to avoid breaking logic.
- **Before modifying business rules:** ensure you understand all dependencies.
- **During application cleanup:** identify unused or obsolete components.
- **When troubleshooting unexpected results:** trace all calculation paths.
- **For large-scale redesigns:** map out all connections across metadata, rules, and dashboards.
- **Preparing for audits or documentation reviews:** produce evidence of where key elements exist.
