

The company is a rapidly growing data center provider serving enterprise and hyperscale customers across the Asia-Pacific region. The organization develops and operates carrier-neutral, energy-efficient digital infrastructure that supports a wide range of business and cloud computing requirements.

Key Benefits

- ✓ Reduced the financial close cycle from **4–5 weeks to 1.5–2 weeks**
- ✓ Improved reporting accuracy through automated consolidation
- ✓ Reduced manual effort and spreadsheet-related risks
- ✓ Improved collaboration and accountability through workflow-driven processes
- ✓ Enhanced auditability and compliance for investor and management reporting
- ✓ Improved data accuracy through direct ERP integration
- ✓ Established a scalable foundation for future finance transformation initiatives

Fast-Growing Asia-Pacific Digital Infrastructure Provider

OneStream Financial Close, Consolidation, and Reporting, Direct ERP Integration, AMCO Application Lifecycle Management

BUSINESS NEED

With 34 entities to consolidate and a lean finance team, the organization's Excel-based consolidation and reporting processes could no longer keep pace with business growth. Manual processes, limited auditability, and multi-entity, multi-currency complexity made reporting increasingly difficult to manage. Finance leadership needed a scalable solution that could improve accuracy, control, and reporting efficiency.

ENGAGEMENT

AMCO implemented OneStream to modernize the organization's financial close, consolidation, and reporting processes. Leveraging pre-built accelerators and proprietary AMCO Blueprints and Solutions, the project delivered a future-ready finance platform with improved governance across the finance process while maintaining flexibility for future expansion.

Unified Finance Platform

34-Entity Consolidation

Workflow Automation

Direct ERP Integration

Multi-Currency Consolidation

Drill-Down Visibility

Future-Ready Foundation

On-Time Go-Live

The customer also engaged AMCO Managed Services to support ongoing platform optimization and future enhancements.

FUTURE PLAN

Following the successful implementation of financial close, consolidation, and reporting, the organization plans to expand its use of OneStream by implementing planning, budgeting, and forecasting capabilities. It is also exploring the development of management reporting within the platform to further OneStream's unified finance solution.

Thanks for everyone's hard work and the great achievement of going live on schedule.
