

Tax Provisioning in OneStream

Unite corporate finance with your tax processes using the tax provisioning application developed by AMCO.

Our tax provisioning solution will unify these functions and improve efficiency, accuracy and the speed of tax reporting all within the OneStream platform.

How does it work?

The OneStream Tax Provisioning solution integrates tax and financial reporting into one platform streamlining your tax process, creating efficiency and freeing up finance time. With our starter kit we bring an accelerated deployment of tax provisioning into your OneStream platform.

OneStream Tax Provisioning is installed in the same platform as your financial module but utilizes a separate tax cube to leverage your financial data and bringing full flexibility to manage separate and distinct data sets and processes.

Main benefits:

- ✓ Truly integrated, no interfacing or data transfer reduces reconciliation needs
- ✓ Data from financial reporting is re-used, adjustments in actual reporting are immediately visible in the tax provisioning
- ✓ Tax Data is submitted in addition to commercial figures, which result in a clear bridge between ETR and STR
- ✓ No extra license needed for users that already have OneStream access
- ✓ Adding data through the OneStream workflow process, which enables locking and certification steps
- ✓ Leverage the chart of accounts and processes setup for the financial close.
- ✓ Clear insights in true steps and return to current position
- ✓ Extensive audit trail

AMCO Solutions is a global finance business partner providing end-to-end business services for CPM & ERP solutions.

We are a OneStream Diamond Partner, one of the few diamond partners globally, and the only diamond partner in APAC and the Middle East.

AMCO operates in 11 locations worldwide, supported by 200+ dedicated professionals.
